

# SAVORY LEGACY

# ABSTRACT

This project aims to bridge the gap between local restaurants in San Cristóbal de Las Casas and potential customers (locals, national, and international visitors) by providing a digital platform with advanced search filters (price, schedule, cuisine type, and location). Through an intuitive interface including a search bar and personalized filters by promoting culinary diversity and supporting the local economy.

# Origin of the project

Our project was inspired by the official website of San Cristóbal de las Casas, which provided limited or outdated information about local restaurants, often redirecting users to social media pages for details. To solve this, we created a dedicated platform featuring comprehensive profiles of restaurants (both established and small businesses), including key details like menus, pricing, hours, location, and amenities all in one place.

# What is it about?

---

This project is a user-friendly digital platform designed to help both tourists and locals easily discover restaurants in San Cristóbal de las Casas, while helping small eateries gain visibility. It features search filters (price, cuisine, hours, location) and complete profiles (menus, photos, contact info), solving the problem of scattered restaurant information across social media.
